HTML, CSS, Java, C++, Python

projects

Chopstix – Lead UI Designer, UX Researcher

Personal project, concept

September 2020

Created an original app concept that is catered towards Asian cuisine and has a platform that connects foodies. Implemented solutions with design thinking and user research and created sketches, personas, wireframes, hi-fidelity mockups, and prototypes. Outlined major learning objectives, and produced comprehensive design documentation.

Dot – Lead UI Designer, UX Researcher

Personal project, concept

February 2021

Created and designed an app concept for those who need to track their menstrual cycles. Created sketches, personas, wireframes, hi-fidelity mockups, and prototypes. Outlined major learning objectives, and produced comprehensive design documentation.

MyFitnessPal Redesign – Lead UX Designer

Personal project, redesign

January 2021

Redesigned the MyFitnessPal app to have a more modernized, sleek look. Studied the app design and critiqued. Utilized color palettes and created hi-fidelity mockups that improved user experience. Documented A/B comparisons and reflections.

volunteer experience

Big Design Conference

Fall 2020

Volunteered for the Big Design conference as a member of the UX Club.
