Interests

Drawing + art commissions
Traveling and exploring
Food blogging
Social media trends

Experience

Commvault - UX Design Intern

June 2021 – August 2021 • Tinton Falls, NJ (remote)

- Improved and created new material for the Metallic design systems, helping transition to a new user interface.
- Led designs for the Managed Service Provider portal which allows for easier organization and management. Presented designs to senior engineers to ensure feasibility.
- Conducted research and comparative and competitive analysis to create wireframes and prototypes.

Projects

Chopstix — Lead UI Designer, UX Researcher

September 2020 - March 2021

- Created an original app concept catered towards combining Asian cuisine food reviews and a social platform. Led the design, research, and evaluation.
- Created sketches, personas, wireframes, hi-fidelity mockups, and prototypes. Implemented solutions with design thinking, user research, and user testing.
- Outlined major learning objectives and produced comprehensive design documentation. 100% of testers believed this app had potential as a competitor.

Dot — Lead UI Designer, UX Researcher

February 2021

- Led research and design of an original app concept catered towards those who need to track their menstrual cycles.
- Implemented research findings on the cycle and outlined major learning objectives. User tested and iterated for feedback.

MyFitnessPal Redesign — Lead UX & UI Designer

January 2021

- Redesigned the MyFitnessPal app to have a more modernized appearance and improved user experience.
- Studied the app design using heuristic evaluation. Utilized color palettes and created hi-fidelity mockups. Documented A/B comparisons and reflections.
